Greetings Apartment Manager and the list of relevant CCs: in this addressing. I hope this message finds you well. I request that you use the ReplyToAll when responding to this email.

Yes, you will find the FBI included into the header address of this email as an introduction to a crime that is occuring to me.

My name is James Martin Driskill with a possible last name change to Houser. (Ref Housing)

I know this is a preannouncement. This is a preliminary introduction since I do not have any connectivity to social services or any kind of effective help.

I live out of the area (San Bernardino) and if there is not a digital submission process, I would like an application mailed to me on a timely manner to be able to participate in the current draw to the waiting list.

If I am lost to a process and become sick from a disease that the HOPWA HUD housing program is to prevent, so be it. All of you have been given notice of how extreme and dire an extremely low CD4/CD8 Blood Test reflects on my overall HIV Aids Disease.

<https://www.webmd.com/hiv-aids/what-to-know-about-cd4-cd8-ratio-test>

A CD4:CD8 ratio of more than 1.0 is considered normal. A low ratio (more CD8 cells than CD4) is often seen in HIV infections.

The CD4:CD8 ratio test judges the strength of your immune system. It also tells your physician if you are at risk for opportunistic infections like [pneumocystis pneumonia](#). Your physician may want to protect you by prescribing some medicines.

A low CD4:CD8 ratio during treatment predicts that the virus hasn't been completely removed from your blood. If treatment begins early in the course of an HIV infection, your CD4:CD8 ratio is likely to become normal in about 6 years. Late and irregular treatments are associated with this test remaining abnormal.

CD4:CD8 Ratio

Traditionally, CD4 counts and viral loads were used to judge the body's response to HIV treatment. But you may be experiencing a weakening of your immune system despite having a normal CD4 count. The CD4:CD8 ratio is more useful in judging the immune system's function. People with HIV and a low CD4:CD8 ratio have increased frailty and mortality.

---- end of WebMD article on Cd4/Cd8 ratio.

Foothill Aids Project is still not open individually for me to obtain client services even though my health based case worker at Kaiser Permanente informed me that I should have case manager services.

I am considered homeless. On a fixed social security security disability of net \$2150 a month. Before leaving this room and board option for \$800 a month,I was living on the street of San Bernardino with tent and sleeping bag and being Cyber harassed and real world (IRL) stalked and physically assaulted when they stole my tent and supplies. I am currently housed by pathway of adult protective sevicees at a room and board for \$800 a month. My options to live under this current era homeless population problem has a goal to forcefully and desperately change on my 59th birthday on September 1st. Willing to locate anywhere on the major metropolitan areas of the United States of America.

As a disabled housing opportunity applicant,

I qualify for several HUD subsidized programs for immediate placement and sign up with your local HIV/Aids social services agency to pay for both first month and deposit funds.

With so many people homeless and no affordable housing units available the wait list process is a joke.

I am homeless with a mental health and physical health illness disease.

I am willing to crash on the streets of Nan Nuys homeless with a tent and sleeping bag to restart over once again.

Your location is new and freshly built. Please share my story outward for the record.

I hope that I am qualified and considered for your initial tenant placement.

The following text I am supplying to anyone that can assist me in securing a safe and dignified housing option. I am willing to relate to anywhere.

The chat between Ezekiel is a bit suspicious as the agenda for the first moments of this exchange was to establish a deposit to reserve the housing unit at \$840 a month.

I don't even know how I get myself into the these affairs. I need a real case manager and one is not available to me via FAP in San Bernardino which is where everyone directs me to.

Plan your digital afterlife with Inactive Account Manager

Not many of us like thinking about death – especially our own. But making plans for what happens after you're gone is really important for the people you leave behind. So today, we're launching a new feature that makes it easy to tell Google what you want done with your digital assets

when you die or can no longer use your account.

The feature is called [Inactive Account Manager](#) – not a great name, we know – and you’ll find it on your Google Account settings [page](#). You can tell us what to do with your Gmail messages and data from several other Google services if your account becomes inactive for any reason.

For example, you can choose to have your data deleted – after three, six, nine or 12 months of inactivity. Or you can select trusted contacts to receive data from some or all of the following services: +1s; Blogger; Contacts and Circles; Drive; Gmail; Google+ Profiles, Pages and Streams; Picasa Web Albums; Google Voice and YouTube. Before our systems take any action, we’ll first warn you by sending a text message to your cellphone and email to the secondary address you’ve

provided.

We hope that this new feature will enable you to plan your digital afterlife – in a way that protects your privacy and security – and make life easier for your loved ones after you're gone.

Gang stalking, a term that describes the orchestrated harassment and intimidation by a
collective against an individual or smaller group, is a disturbing phenomenon with real-world
implications. According to the International Journal of Environmental Research and Public
Health, stalking affects 6-7.5 million people in the U.S. each year, with a subset potentially
experiencing the group-based tactics characteristic of gang stalking. While comprehensive
statistics on gang stalking specifically are elusive, its impact can be profound, leading to
severe psychological distress. Laws vary by jurisdiction, with some states classifying gang
stalking as a felony, reflecting its seriousness. Understanding what gang stalking is crucial
for recognizing its signs and providing support to those affected.

Hello? Grammarly, Is this an accurate assessment of these scores you sent me?

My Google Review of Foothill Aids Project:

I attempted to get assistance from FAP during this interface time back again homeless. I am homeless here in my hometown of San Bernardino from an 11-month hate and harassment campaign conducted by the leadership directors of the Colorado Health Network in Denver Colorado. This is where I attempted to create a startup project of an adult school of consent practices as a community resource. When I moved in to HIV residency, I told the building manager that I was wanting to create a community space.

Anyway, in my first attempt to interface with FAP since I came back, they would not incorporate my need to report and place the evidence that I have been targeted by a hate group. I attempted this with of course having to deal with new doctors, new treatments, new case management scheduling, etc. It was more than enough when I could not get a letter that was written in 2007 by then FAP mental health director Doctor Howard Newsome. In that letter from 2007, what was the exact same thing that happened in Oakland and Denver.

The letter is on file here:

<http://google-reviews.foothillaidproject.fuckeduphuman.net/MentalHealthAdvocacyLetterJan2007.jpg>

In this letter from 2007, Doctor Howard Concludes:

"However, I [Doctor Howard] believe that until there is an appropriate resolution (he [James Driskill] wants an absolution) of his housing conflicts, he will remain in a vulnerable state regarding his overall HIV and Mental Health status."

That was relating to Oakland CA in 2005 and the very exact similar conditions that drove hate into a tenancy collapse in Oakland was experienced in Denver 2016/2017. The endgame of this targeted action against me was to remove my influence from the local HIV community.

Further, It would not become apparent who the persons involved in the source of this hate target campaign against me was until after my filed eviction Nov 2016. it would only become apparent later in that next year by two factors to include the reporting that appeared against Colorado Health Network posted as negative outlook employee reviews on Glassdoor.

These started to appear on July 28th 2017 about 2 weeks after I had to leave the Denver area back to my hometown. And now we have these issues cropping up in a different Ryan White Care Act servicing region. More to the point, the mental health director that was from 2007 is no longer under head of that Department and now is run by some other person, less credentialed that a Phd.

I attempted twice to interface with this story and the mental health advocacy letter written from 2007 inclusive of my case management. Nothing worked. I had to walk away [as the other Google Reviewer here suggests] from my interface to this agency because of loss of confidence and loss of trust that anything constructive can be done in my case.

My case manager placed me on a housing interview to a resource that I did not qualify for. I have been living with family care as a refugee status from haters that will not stop their hate on me. My case manager deceived me in three critical cause of concerns.
